Quarterly Update as at 31 December 2015

Introduction

Rabobank Australia Limited (“the Bank”) is an Authorised Deposit-taking Institution (“ADI”) subject to regulation by the Australian Prudential Regulation Authority (“APRA”) under the authority of the Banking Act 1959.

In accordance with the Australian Prudential Standard 330 (“APS 330”), financial institutions are required to disclose prudential information. A subset of this information is disclosed quarterly.

Verification of the Disclosure

This Basel III Pillar 3 Disclosure (“the Disclosure”) document is unaudited. However, the Disclosure (being prepared as at 31 December 2015) uses information consistent with the independently reviewed information that is supplied to APRA or is otherwise published, as required under the Australian Prudential Standard 310 (“APS 310”).

Additionally, it has been verified in accordance with Board approved policy, ensuring consistency with the Bank’s Annual Report.

Background of Basel II and Implementation of Basel III

The Basel II Capital Accord principles took effect in Australia from 1 January 2008. The framework comprises of three pillars:

- Pillar 1: Minimum Capital Requirements
- Pillar 2: Supervisory Review Process
- Pillar 3: Market Discipline

In December 2010, the Basel Committee on Banking Supervision (“BCBS”) published a discussion paper on banking reforms. These major reforms are to be phased in from 1 January 2013 to 1 January 2019.

In September 2012, APRA published final standards for the implementation of the Basel III capital reforms in Australia. APRA has adopted a more conservative approach than the minimum standards published by the BCBS and a more accelerated timetable for implementation.

The Bank commenced reporting its regulatory disclosures to APRA under the requirements of Pillar 1 from 1 January 2008 using the Standardised Approach. The Bank also adopted the Basel III measurement of regulatory capital effective from 1 January 2013.

The Bank implemented the Pillar 2 requirements including documentation of its Internal Capital Adequacy Assessment Process (“ICAAP”) with the latest version approved by the local Board in March 2016.

The Chief Executive Officer attests that the Disclosure meets the requirements of APS 310 Audit and Related Arrangements for Prudential Reporting. Disclosure controls and procedures have been designed and implemented to effectively manage prudential reporting risk.

Scope of Application

The Bank is a Level 1 entity for regulatory (APRA) reporting purposes. The Bank is a solo entity, therefore it does not have any subsidiaries (Level 2 entities).

Level 1	Level 1 – Standalone basis (“Solo”)
Level 2	Level 2 – The consolidation of the Bank and all its subsidiary entities other than non-consolidated subsidiaries (“Consolidated”)

Context

The Rabobank Group (“Group”) gained accreditation from the De Nederlandsche Bank (“DNB”), Group’s Home Regulator, to use the Advanced Internal Ratings Based Approach (“AIRB”) for credit risk and the Advanced Measurement Approach (“AMA”) for operational risk from 1 January 2008.

The Rabobank Group gained DNB accreditation to use the AIRB for credit risk from 31 December 2008 for the Bank’s Rural portfolio. The Rural lending portfolio is a significant majority of the Bank’s lending by exposure.

The Bank currently remains on the Standardised Approach for Credit, Market and Operational risk for APRA regulatory reporting.

Nature of Business

The Bank continues to focus on the provision of flexible, competitively priced, secured loans to the rural sector in Australia. The Bank continues to provide internet banking services to retail clients through its RaboDirect division.

There were no significant changes in the state of affairs of the Bank during the financial year.

The following table provides a reconciliation of all regulatory capital elements to the Balance Sheet of the Bank in its audited financial statements.

Attachment F

The Bank manages its LCR position on a daily basis that includes a buffer above the minimum regulatory requirement and according to the Board's risk appetite.

The Bank maintains a diverse mix of liquid assets consisting of cash with the Reserve Bank of Australia (RBA), Australian Semi-Government and Commonwealth Government securities. This composition has remained relatively stable over the last year. There is no reliance on a Committed Liquidity Facility.

The LCR net cash outflow (NCO) represents potential cash outflows from on and off balance sheet activities within a 30 day liquidity stress scenario, after applying APRA prescribed run-off factors to maturing debt and deposits, and inflow factors to assets. As part of its overall liquidity management strategy the Bank manages its wholesale funding, and non-wholesale deposit and loans in a manner that aims to manage NCO's within the Board's risk appetite. The Bank's funding is predominantly through retails branch clients or RaboDirect. There are very limited foreign currency transactions, or derivatives transactions in the Bank.
